# ST NICHOLAS COLLEGE <br> HALF YEARLY PRIMARY EXAMINATIONS 

February 2013

YEAR 6
Mathematics (Written Paper)
TIME: 1 h 15 min
Total Mark
Name: $\qquad$ Class: $\qquad$

1. Work out the sums.

Put $a(\checkmark)$ in the box if the answer is greater than 450.
Put $a(X)$ if it is not.
The first one has been done for you.
greater than 450
$100+500$

$149+137+158$

911-447 $\square$

## 2. Complete

| a) $49 \times 3=\square$ | $\square$ | b) $23 \times \square$ |
| :--- | :--- | :--- |
|  |  |  |
| c) $840 \div 5=$ |  |  |
|  | d) | $\square \div 7=17$ |

3. Fill in

| a) | 2725.6 to the nearest whole number |  |
| ---: | :--- | :--- |
| b) | 2725.6 to the nearest 10 |  |
| c) | 2725.6 to the nearest 100 |  |
| d) | 2725.6 to the nearest 1000 |  |

4. Write the missing numbers

| a) $\square \div 100=0.75$ |
| :--- |
| b) $11 \div 10=\square \div 100=1.48$ |
| c) $\square=23.2$ |
| d) $232 \div \square=\square$ |

5. a) Peter sells ribbon at 63 c per metre. Mum buys 7 metres of ribbon. How much does she pay?

b) Ben sells 6 metres ribbon for $€ 4.20$. How much does 1 metre of ribbon cost?

c) Who sells the cheaper ribbon, Peter or Ben?

6. Look at these shapes. There can be more than one correct answer. Choose one.

Shape A

Shape B

Shape C

Shape D

Shape E
a) Shape $\qquad$ has no lines of symmetry.
b) Shape $\qquad$ has two lines of symmetry only.
c) Shape $\qquad$ has four lines of symmetry only.
d) Shape $\qquad$ has many lines of symmetry.
e) Draw all the lines of symmetry on Shape $\mathbf{E}$.
7. Underline the correct estimation.
a) The height of a classroom door. $2 \mathrm{~cm} \quad 2 \mathrm{~mm} \quad 2 \mathrm{~m} \quad 2 \mathrm{~km}$
b) The length of a child's shoe. $2.2 \mathrm{~cm} \quad 22 \mathrm{~mm} \quad 22 \mathrm{~cm} \quad 22 \mathrm{~m}$

c) The weight of the Maths textbook 'Shape, Data and Measures'. $2.4 \mathrm{~g} 240 \mathrm{~g} \quad 2400 \mathrm{~g} \quad 240 \mathrm{~kg}$
d) The weight of 10 pears and 10 oranges. $15 \mathrm{~kg} 4 \mathrm{~kg} \quad 8000 \mathrm{~g} \quad 500 \mathrm{~g}$

8. a) Kate takes half an hour to walk from home to school.

She arrives at school at $8: 25 \mathrm{am}$. At what time did she leave home?

b) Tom leaves school at half past two. He arrives home at ten past three. How many minutes did it take him to get home?

9. a) Work out the total weight in kilograms of the amounts shown on these three sacks of potatoes.

$\qquad$ kg
b) Change your answer to grams.

c) The original weight of each sack of potatoes was 15 kilograms. Find the total amount of potatoes used. Give your answer in kilograms and grams.
$\qquad$
10. This is a road map with distances from neighbouring towns and villages.

a) Write the distance for a return journey between Rabat and Mgarr.
$\qquad$
b) Find the shortest distance between Attard and Mtarfa.

c) The distance for a return journey between Mtarfa and Batrija is 3.5 km . Write the distance between the two villages.

11. Mary has 48 computer games. She gives $\frac{3}{8}$ of them to her friend Joan and $\frac{1}{4}$ to her sister Susan.
a) How many games does Mary have now?

b) She gives half of the remaining games to another friend. How many does she have now?

12. John has been collecting 10c coins while Mary has been collecting $5 c$ coins since they were very young. John has 2695 coins and Mary has 3348coins.
a) How many more coins does Mary have?

b) How much more money does John have?

c) How much money do they have altogether?

13. Do not use a ruler to answer this question.

This shape is made up of Rectangle A and Square B.

a) Rectangle $A$ is 2 cm wide and $\qquad$ cm long.
b) The area of Square B is $\qquad$ $\mathrm{cm}^{2}$.
c) The total area of the whole shape is $\qquad$ $\mathrm{cm}^{2}$.
14. To celebrate his birthday John has a budget of $€ 74$. He decides on a pizza party at home.

John needs to place the order. He has two options how he can spend all the money on pizza without receiving any change. Can you find the two options for John?

Option 1.
$\qquad$ large pizza and $\qquad$ small pizza.

Option 2.
$\qquad$ large pizza and $\qquad$ small pizza.
15. The graph and the table below show the amount of bookings a hotel had for the first six days in May.

Bookings

| Days | 1 | 2 | 3 | 4 | 5 | 6 | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Bookings | 500 | 700 | 800 | 300 | 700 |  |  |

a) Fill in the table for day 6 from the graph.
b) Find the total number of bookings and fill in the table.
c) Complete the graph for days 3 and 5 from the table.
d) Write the number of bookings on day 3 as a fraction of the total number of bookings. Write the fraction in its lowest terms.

16. Who am I?

Note: I am a number between 35 and 58.
Follow all the clues below to guess who I am.

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |
| 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 |
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40 |
| 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 50 |
| 51 | 52 | 53 | 54 | 55 | 56 | 57 | 58 | 59 | 60 |
| 61 | 62 | 63 | 64 | 65 | 66 | 67 | 68 | 69 | 70 |
| 71 | 72 | 73 | 74 | 75 | 76 | 77 | 78 | 79 | 80 |
| 81 | 82 | 83 | 84 | 85 | 86 | 87 | 88 | 89 | 90 |
| 91 | 92 | 93 | 94 | 95 | 96 | 97 | 98 | 99 | 100 |

I am divisible by 8 .

I am not divisible by 5 .

I am not divisible by 3 .

I have one odd and one even digit.

End of paper

| Marking Scheme | $1-4$ | 4 marks each | (16 marks) |
| :--- | :---: | :--- | :--- |
|  | $5-12$ | 5 marks each | $(40$ marks $)$ |
|  | $13-16$ | 6 marks each | $(24$ marks $)$ |
